Everybody has lamps at home. They are important because they add a special atmosphere to your house. There are a lot of different kinds of lamps. There can be wall lamps or foot lamps, table lamps or floor lamps. There are reading lamps and lamps which we use for decoration. The light from a lamp must be enough for you but it should not get into your eyes. Direct light from a lamp can hurt your eyesight. If you need to buy a lamp, you must think about its purpose. It will make it easier for you to choose its shape, style and colour.
